QUALITY & INNOVATION

Driven by scientific excellence

Our scientists and engineers are taking discovery and innovation to the next level. We never rest on past accomplishments, we build on them. We are diligent and inventive in our approach to making Amway™ products and digital experiences better for our customers.

Strength from science

A global leader in health and wellness for more than 60 years, our world-class scientists, engineers, and product development experts are the force behind Amway's leading nutrition, beauty, and home care products.

We believe in connecting directly with our customers, global colleagues, and external partners to understand and deliver innovative solutions to Amway Business Owners.

Best of science

While efforts behind some segments of product development research are kept secret for competitive purposes, others warrant a different approach: sharing. Whether it's submitting our research for publication in scientific journals, applying for a new patent or opening the results of a study for public domain, Amway R&D believes in the importance of sharing to advance scientific research.

900+ global patents & patents pending

Amway holds more than 900 global patents and patents pending for our products, a natural result of our focus on innovation and our rigorous testing processes.

500,000+ tests

We perform more than 500,000 quality tests per year, demonstrating our dedication to delivering safe and effective products.

200+ advanced degrees

Our R&D team holds more than 200 advanced degrees and includes some of the best and brightest scientists on the planet.

Amway has more than 500 scientists, engineers, and technicians

Our global family of more than 500 scientists, engineers and technicians work with leading universities, science institutes and advisory boards to conduct world-class research and product development.

OPEN INNOVATION

Amway Scientific Advisors

Amway Scientific Advisors are industry-leading experts in the fields of beauty, health and nutrition. These advisors support Amway by providing feedback on current and future studies, advising on research activities, offering scientific recommendations and facilitating new collaborations with leading institutions.

A global team

More than 500 scientists, engineers, and technical professionals extend our innovation and science capabilities through 11 locations to deliver global, regional, and local product research and development.

GLOBAL R&D FOOTPRINT

More than 750 locations

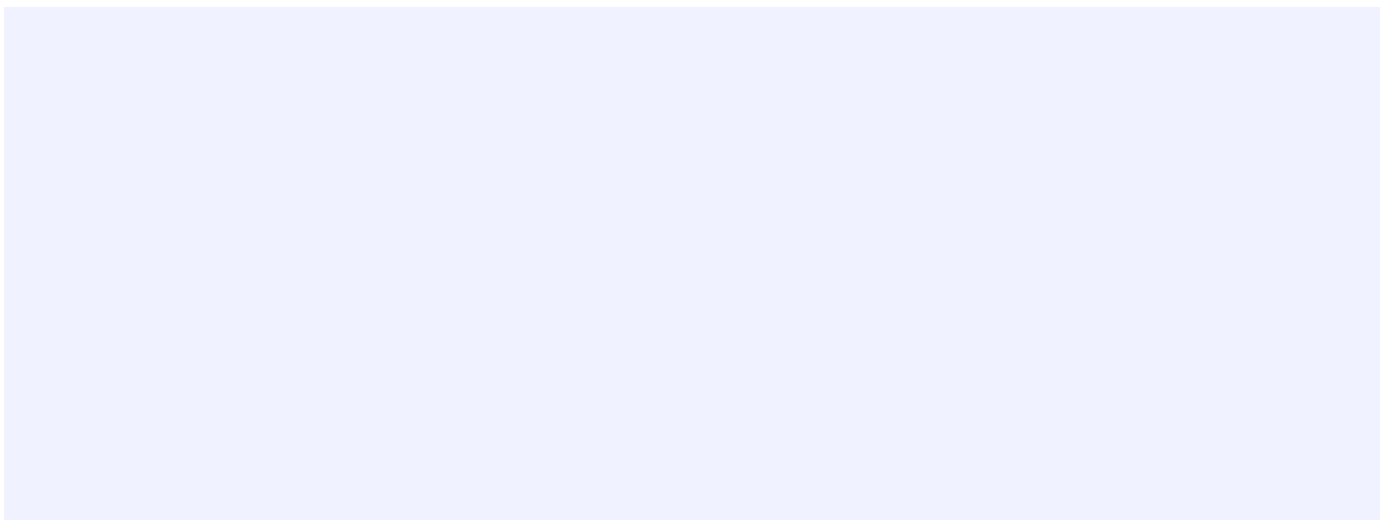

There are more than 750 Amway places and spaces around the world that include experience centers, shops, plazas, and distribution centers.

Manufacturing facilities

Amway owns six strategically placed manufacturing operations that produce millions of high quality products for our ABOs and customers worldwide.

Major Distribution / Warehousing

These hubs exist in nearly every region in which products are available for purchase. The facilities provide a modern competitive delivery experience for our customers and ABOs.

Protection is our promise

Amway has always been a person-to-person business. Since 1959 our word has been our promise. We firmly believe, as a values-based, family-owned company, we must protect those who represent us or purchase from us. That's why we offer Amway Promise – a comprehensive customer service and consumer protections offering that protects Amway business owners and their customers with satisfaction guarantees, warranties, inventory buy-back provisions and much more.

FEATURED RECOGNITION AND CERTIFICATION ORGANIZATIONS

Safer Choice partnership

Safer Choice is a US EPA voluntary program that helps consumers identify products that are safer for you, your family, and the environment. Every ingredient in a product formula and package must meet EPA criteria for safety and sustainability. Forty-three different Amway Home Care formulas are Safer Choice recognized.

NSF International

NSF International is a public health and safety company with highly rigorous standards. For more than 30 years, NSF has independently certified Amway water treatment systems, including eSpring™ units, for material safety, structural integrity, and contaminant reduction claims.

British Allergy Foundation

The British Allergy Foundation is a medical charity that works with manufacturers worldwide to test and promote the benefits of products and appliances that reduce or remove exposure to allergens. Products that receive its Seal of Approval, such as the Atmosphere™ Air Treatment products, have been through scientific testing that is carried out by an independent laboratory and that meet protocols that have been created by leading allergy specialist.
